

Android Final Project Deliverables #3

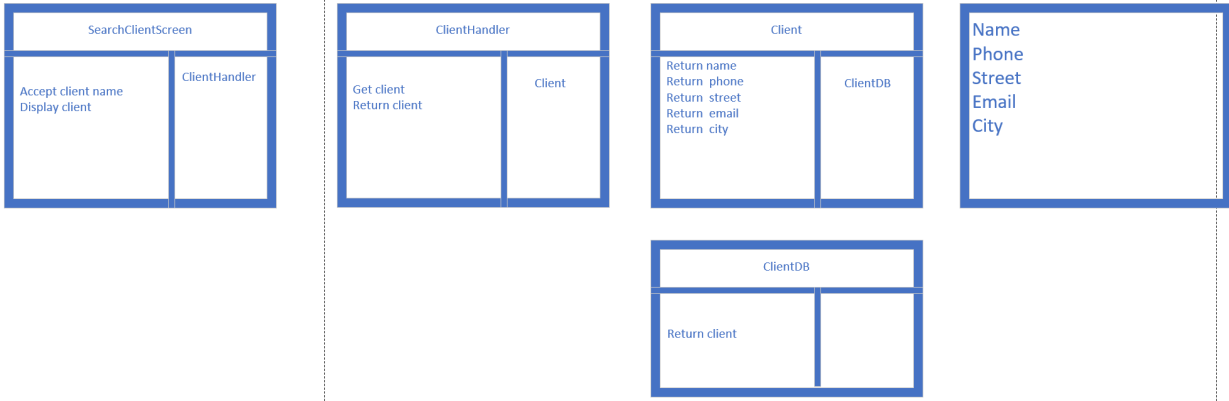

New Century Wellness Group Mobile Client List Application

1) Use Case Diagrams(Search, Add, Delete)

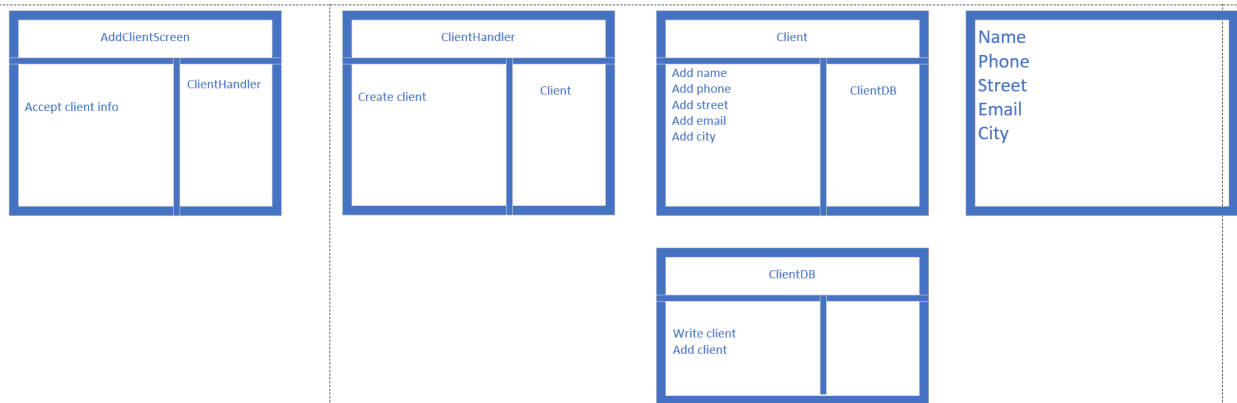

2) CRC Cards

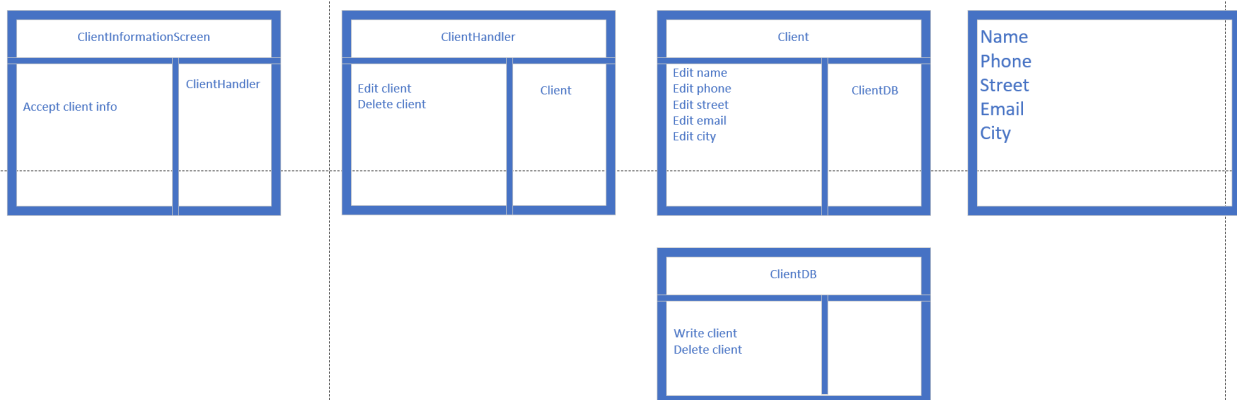

2.1 Search client CRC cards

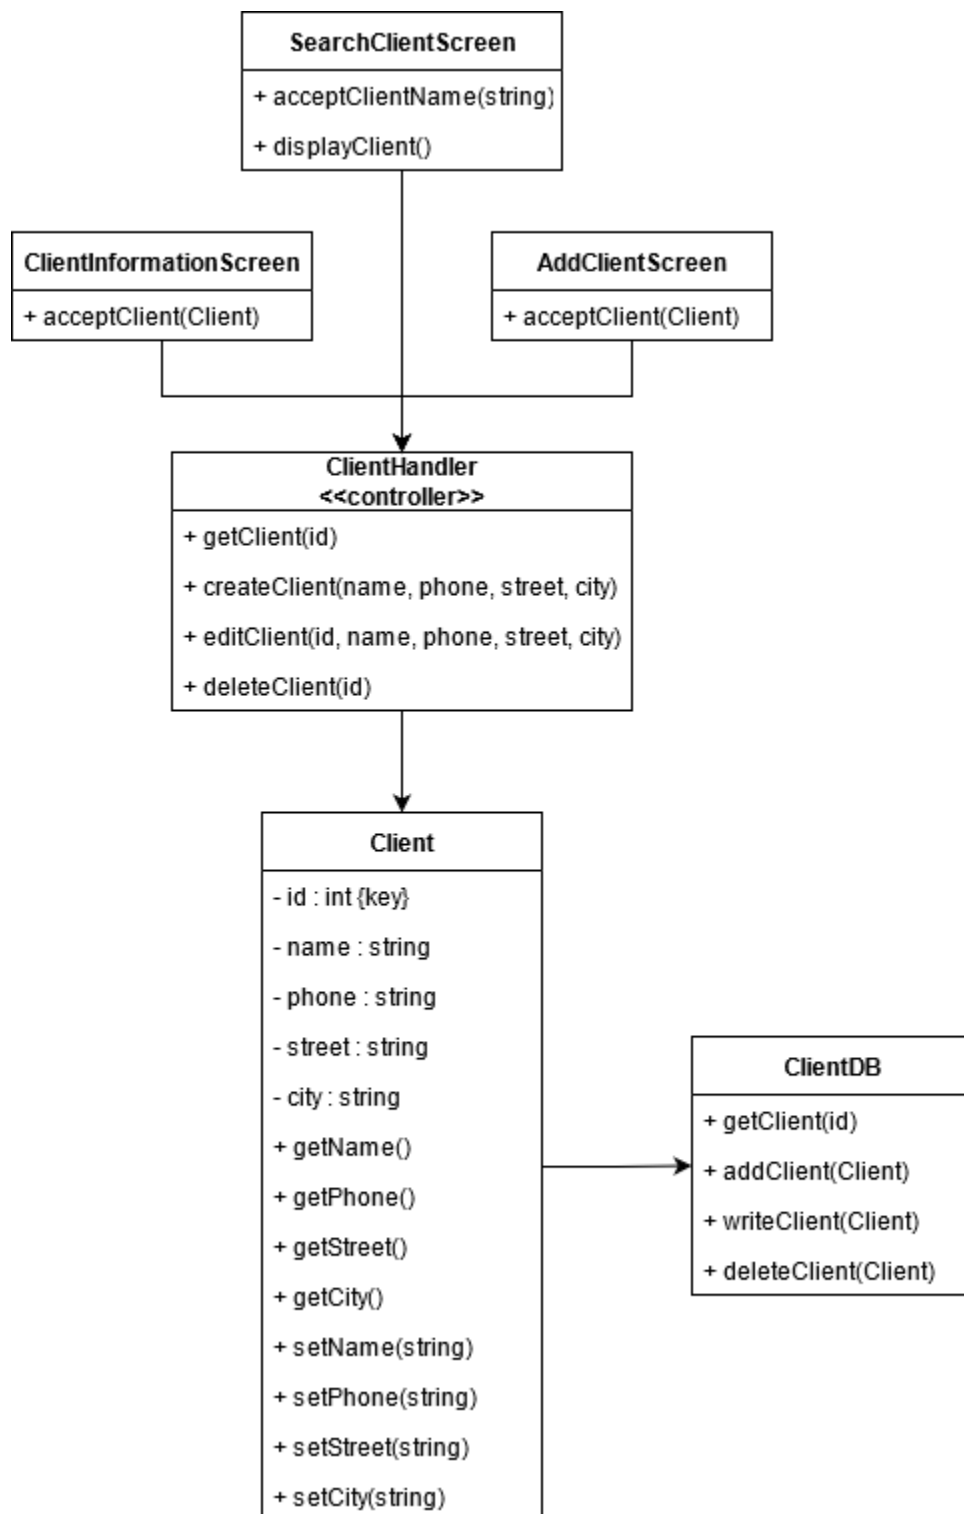

2.2 Add client CRC cards

2.3 Delete client CRC cards

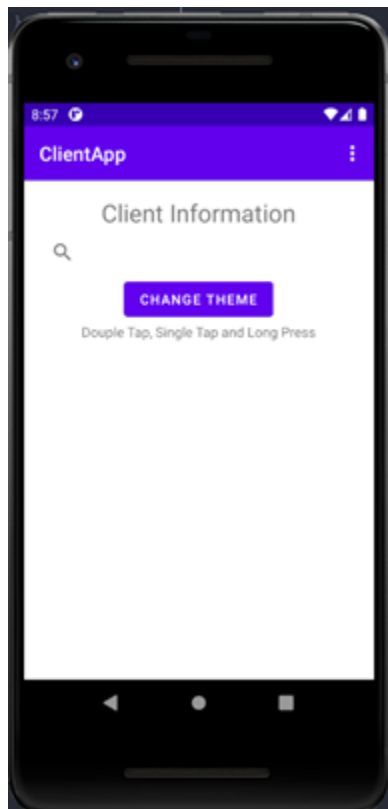

3 Design Class Diagram

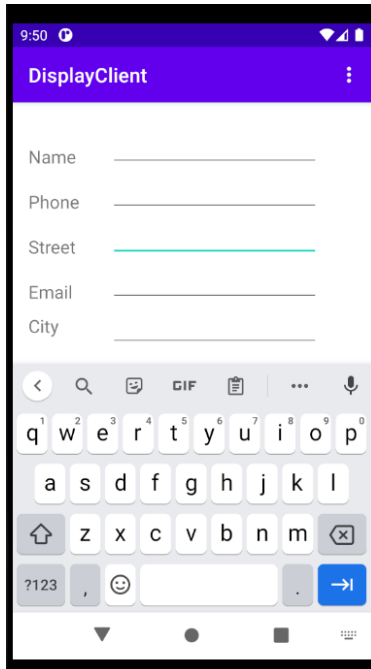

4 Graphical User Interface(Jordan Albayrak & Tristan Giguere)

The start menu allows you to add a new client or click on a previous existing one to then either edit or delete. There is a search bar to search through the clients and also a change theme button that uses gestures.

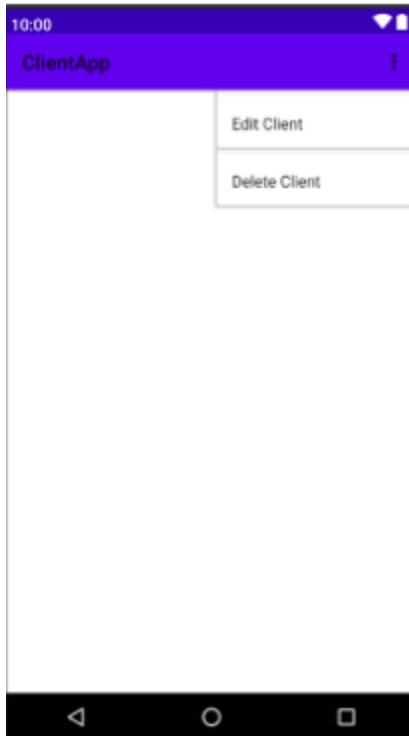

This is the add new client menu where you fill out the client's information.

Within the start menu you also have the option where you can add new client

Once an existing client is pressed you will enter a view displaying the entered info(just like add new client but with info already added) you can choose to edit or delete.

User Manual

1. Open the app, once on the start screen simply select the option menu (3 dots on the top right) and from there you may press the option to add a client. You also have the option to search for a specific client with the search bar and change the theme with the change theme button.
2. Once the option is pressed you will be sent to a new view where you can input your clients information and save it.
3. Once saved, you will be brought back to the start menu with your client added to the view. From here, you can chose to press on the client once again to be brought back to the previous window
4. From here you may click on the same option menu as previously stated to be given the option to either delete or edit the client.
5. If the delete option is selected you will need to confirm it. It will bring you back to the main start menu.
